## 1 Statement of Work

### 1.1 Purpose

The purpose of this request for proposal (RFP) is to invite prospective vendors to submit a proposed solution for the second phase of the Converged Infrastructure project to Butler Community College. Phase 2 of the Converged Infrastructure project includes converged computing refresh for future growth and ERP incorporation into a singular system. The RFP provides vendors with the relevant operational, performance, application, and architectural requirements of the system.

### 1.2 Coverage & Participation

The intended coverage of this RFP, and any agreement resulting from this solicitation, shall be for the use of all departments at Butler Community College along with any satellite offices. Butler Community College reserves the right not to enter into any contract, to add and/or delete elements, or to change any element of the coverage and participation at any time without prior notification and without any liability or obligation of any kind or amount.

## 2 General Information

### 2.1 Original RFP Document

Butler Community College shall retain the RFP, and all related terms and conditions, exhibits and other attachments, in original form in an archival copy. Any modification of these, in the vendor's submission, is grounds for immediate disqualification.

### 2.2 The Organization

Butler Community College is a public, two-year, co-educational institution located in El Dorado, Kansas. Established in 1927 as El Dorado Junior College, Butler now stands as the second largest community college in Kansas and the sixth largest educational institution in the state. That means, annually, more than 13,000 students ranging in age from sophomores and juniors in high school to grandparents seeking a new career, enjoy and benefit from our small classes and nurturing environment.

Butler students have access to more than 90 different academic programs across 24 learning sites which includes numerous high schools in the area. The faces in our classrooms come from a variety of ethnic backgrounds and from all over the U.S. and the world.

In order to better serve our students and the community as a whole, Butler Community College is presenting this RFP to move to a converged technology infrastructure. Migrating multiple computing platforms to a unified technology will position Butler Community College to be more efficient in responsiveness to stakeholder concerns. Additionally, a wholly converged infrastructure allows for streamlined management and a drastic reduction to the complexity of the environment, thus enabling us to focus our efforts on enhancing the overall student experience and ensuring student success.

The compelling motives for this project are current and future needs, a unified management platform, improvements for application availability, and continuity of mission critical data. Data Integrity and the availability of information to all stakeholders is foundational to the mission of Butler Community College. Upon completion, this compute system upgrade will allow better

management of our entire application portfolio and more flexible response to the needs of students, faculty, staff and visitors. In addition to these improvements, it will be the foundation of our ERP, application and security needs fostering growth and ensuring the institution's readiness for future needs.
