

## APICS CPIM - Certified in Production and Inventory Management

The APICS CPIM program has been organized into five modules, each focusing on key areas of study that are integral to an understanding and mastery of production and inventory management principles.

Candidates must pass an exam for each of the modules to successfully complete the APICS CPIM program. The APICS CPIM Basics of Supply Chain Management module has been updated to keep pace with the rapid changes in the marketplace and to better align with the APICS CPIM exams.
